IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

On Oct. 27, 2008, Mr. Gustavo Siller authorized to cancel claims 26-30.

In the election filed on 12/15/2004, applicant's election of species A (claims 17-18 and 21) is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). For allowance, the withdrawn claims 19-20 and 22-23, which depend on the allowed claim 17, should be rejoined.

On Oct. 27, 2008, Mr. Gustavo Siller mentions that the specification has been amended with the preliminary amendment on 09/23/2003 as following:

On page 1, before the first paragraph insert:

This application is a divisional application of currently pending U.S. application Serial 09/896,165 filed on October 6, 1999, entitled "Reflector Providing Particularly High Reflectance in an Intended Viewing Angle and Reflection Type Liquid Crystal Display Device Using the Same".

On Oct. 27, 2008, Mr. Gustavo Siller also authorized to change the abstract into:

Art Unit: 2871

"The present invention provides a reflector having a light-diffusing property which suppresses inter-object reflection over a wide angle, and giving particularly high reflectance in an intended range of viewing angle; and to provide a reflection type liquid crystal display device using the same. The reflector includes a plurality of light-reflective concave portions. Each of the concave portions is formed so that an inclination angle (an angle between a plane tangential to a point on a concave surface and the surface of the base material) is maximum on a side portion of the curved surface, and so that the direction of the side portion having the maximum inclination angle is on a far side from a view point of an observer."

DETAILED ACTION

Allowable Subject Matter

Claims 17-25 and 31 are allowed. The following is an examiner's statement of reasons for allowance:

Claim 17 is allowed since there is no prior teaches a liquid crystal display device comprising a reflector having a plurality of light reflective concave portions arranged randomly adjacent to each other on a surface of abase material, each said light reflective concave portions having a single minimal point and a curved surface with a maximum inclination angle at one side portion, where the side portion having the maximum inclination angle is on a same side of each of the light reflective concave portions, thereof so that the one side portion has a larger reflectance magnitude than an opposing side portion, and a light reflectance peak at a predetermined angle in accordance with a location of the maximum inclination angle, and that opposes a viewpoint of the observer, wherein

- the plurality of the concave portions are formed continuously to each other, are arranged irregularly adjacent to each other, and each of the concave portions is formed as part of a spherical surface,
- each of the light reflective concave portions has a concave shape in cross section, the concave shape having a first curve and a second curve, the first curve having the maximum inclination angle and including one side portion, the first curve and the second curve being concave arcs,

Art Unit: 2871

- the first curve of one of two adjacent concave portions and the second curve of the other one of the adjacent concave portions are continuously connected to each other at a vertex portion, the vertex portion being formed to have an acute angle such that the inclination angle thereof is suddenly reversed, so that the entire surface of the second curve has an arc shape, and
- the average of the absolute value of an inclination angle of the first curve is larger than the average of the absolute value of an inclination angle of the second curve, and reflection property is such that the incident light is reflected by the surface at the second curve so that the direction of reflection is shifted from the direction of regular reflection with respect to the surface of the base material
- the reflection property is such that the incident light which is incident obliquely from above is reflected in a direction shifted toward a direction perpendicular to the surface of the base material, and wherein the second curve is shaped such that when external light is incident at an incidence angle of about 30° a high reflectance is obtained at a viewpoint of the observer, which corresponds to the light-receiving angle in the range of about 15° to about 45° .

Claims 17-25 and 31 are allowed since they depend on the allowed claim 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2871

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
